RESPONSIBILITIES

- Be part of a newly expanded team in Berlin and contribute to the digital transformation of 10 strong industrial B2B businesses.
- o You design and implement effective user journeys for our industrial B2B customers.
 - o Based on existing first versions you build a customer portal that supports the customer along their whole journey from own ideation, product development to sampling, product purchase, and receiving after sales services.
 - o You understand what the users want, what helps develop our business, and create an intelligently built frontend to deliver exactly that.
 - o Moreover, you implement the frontends using a toolbox with CMS, low-code tools, and javascript elements. Together with the team, you decide on how the technology stack develops over time.
 - o You build on top of a modern, headless backend architecture to implement the various functionalities (authentication, product information, commerce etc.)
 - o Furthermore, you collaborate with specialized teams in corporate IT and service providers to adapt and implement existing technology

QUALIFICATIONS

- o degree in (business) informatics or apprenticeship with appropriate experience and at least 3 years work experience with building modern web frontends
- o proficient in HTML, CSS; REST API; Low-code tools, such as OutSystems; CMS, AEM
- o practical experience with building in a JS Framework, such as Angular
- o strong communication skills in English
- o hands-on pioneer mindset, comfortable with building new things in an agile and iterative manner
- o high customer orientation to bridge between coding and a design

BENEFITS

- o 30 days of paid vacation and sabbatical options.
- o Onboarding to help you settle in quickly, ensuring you are part of the BASF team from day one.
- o Flexible working hours so that you can organize your working and private life according to your needs.
- o Location-independent work models with defined days of presence in Berlin and place of residence in Germany.
