

Job Posting Title: 2024 Intern – Software Development Engineer

Location: Hamburg, Germany

Our Company

Changing the world through digital experiences is what Adobe's all about. We give everyone—from emerging artists to global brands—everything they need to design and deliver exceptional digital experiences! We're passionate about empowering people to create beautiful and powerful images, videos, and apps, and transform how companies interact with customers across every screen.

We're on a mission to hire the very best and are committed to creating exceptional employee experiences where everyone is respected and has access to equal opportunity. We realize that new ideas can come from everywhere in the organization, and we know the next big idea could be yours!

The opportunity

We are offering intern positions within our Adobe Cloud Platform (ACP) development team based in Hamburg, Germany. This position is for a currently inscribed student, limited to 6 months of employment for a full time engagement (40 hours per week). This means, you have to be pursuing a relevant University degree (bachelor or master) to apply.

ACP is the platform for multiple Adobe SaaS offerings, operated across multiple regions on Amazon Web Services (AWS) and Microsoft Azure. As a member of a multi-functional, self-organizing development team you will contribute to developing, deploying, and ownership of internal and public dockerized Java microservices.

"Build it and own it!" is the credo for our development teams.

You will collaborate with agile teams located in Hamburg as well as with teams in the US and India. You will also have the opportunity to engage in internal and external communities of interest to learn and grow.

This position is part of the 6-month internship program starting **1st of March 2024!**

What you'll do

- Together with your multi-functional team, pursue a project goal for the microservices that the team is responsible for.
- Show initiative and flexibility to learn on a continuous and self-motivated basis.
- Work in the team and actively contribute to the team culture

What you'll need to succeed

- Knowledge about methods to ensure functional correctness of software and how to create readable and maintainable code in modern Java
- Fundamental knowledge about web services and related technologies like HTTP, JSON and web server.
- Dedication to team-work, self-organization, and continuous improvement
- Proficiency in English, good knowledge or ability to learn German
- Curiosity and high engagement to learn with a systematic and team-based approach

What would be great on top

- Experience with Spring framework
- Knowledge about and familiarity with infrastructure technologies used in distributed cloud systems like containerisation, NoSQL databases, IaaS providers, CI/CD and monitoring tools

What to expect from the recruitment process

All applications will be reviewed after the close date, so please don't panic if you don't hear from us straight away! Our selection process typically consists of three stages as follows:

- Online assessment
- Technical interview
- Soft Skills interview

Benefits

At Adobe, you will be immersed in an exceptional work environment that is recognized throughout the world on [Best Companies lists](#).
